

GABRIEL CARATIHAN

SOFTWARE ENGINEER & BUSINESS AUTOMATION SPECIALIST

Email: gabrielcaratihan2003@gmail.com | GitHub: github.com/GabbyDev0402 | Location: Imus, Cavite, PH

EXECUTIVE SUMMARY

Software Engineer passionate about replacing messy spreadsheets and manual processes with custom, automated web portals. Former ESL Educator turned Systems Architect with a dual perspective that bridges non-technical business leaders seeking operational ROI with robust, enterprise-grade cloud software architecture.

CORE TECHNICAL SKILLS & BUSINESS FOCUS

Languages & Frontend

- TypeScript / JavaScript
- React / Next.js (App Router)
- Tailwind CSS v4 / HTML5
- Framer Motion UI

Backend & Cloud

- Supabase / PostgreSQL
- Node.js / REST APIs
- Firebase / Cloud Firestore
- Netlify / Vercel

Business Automation

- 80%+ Operational Time Saved
- Paper-to-Digital Workflows
- RLS & Bank-Grade Security
- Agentic Prompt Engineering

&i AGENTIC ENGINEERING & BUSINESS TRANSLATION WORKFLOW

Architected applications using advanced agentic workflows via the Antigravity IDE. Directed AI models (Gemini 3.5 Flash / 3.1 Pro) to rapidly prototype UI/UX, establish PostgreSQL & NoSQL data schemas, enforce Row Level Security (RLS) policies, and automate end-to-end business logic, reducing development lifecycles significantly.

EDUCATION & PROFESSIONAL BACKGROUND

Computer Programming Practitioner

Imus Computer College — Systems & Software Development

ESL Educator

Washington School — Educational Technology & Workflows

FEATURED PROJECTS & BUSINESS ROI IMPACT

1. Faculty Leave & Substitute Portal (NEW & FEATURED)

ROI: 90% Faster Absence Processing & 100% Automated Sub Coverage

Live App: <https://faculty-leave-management-portal.netlify.app/> | GitHub: <https://github.com/GabbyDev0402/faculty-leave-hr-portal>

- Replaced manual paper leave forms and phone calls with self-service substitute claiming.
- Engineered PostgreSQL RLS policies & DB triggers to automate leave balance deductions.
- Secured lesson plans with 60-second cryptographic URLs and real-time Postgres WebSocket sync.

2. Enterprise Communications Intranet

ROI: 100% Policy Compliance Verification & Zero Lost Announcements

Live App: <https://washington-school-portal.netlify.app/admin> | GitHub: <https://github.com/GabbyDev0402/washington-school-portal>

- Replaced unorganized email blasts with digital read-receipt tracking & instant CSV compliance logs.
- Implemented Role-Based Access Control (RBAC) with Cloud Firestore Security Rules.
- Streamlined institutional announcement workflows with secure multi-role administrative oversight.

3. Washington Assessment Portal

ROI: Saved Teachers 15+ Hours/Week in Manual Grading

Live App: <https://wcs-exam-portal.netlify.app/> | GitHub: <https://github.com/GabbyDev0402/washington-school-portal>

- Architected dynamic exam creation engine utilizing polymorphic React form components.
- Engineered real-time pivot-table data aggregation for Master Gradebooks & administrative analytics.
- Enforced strict multi-tenant data isolation and time-gated client routing for exam security.

4. AttendancePro Tracker

ROI: 80% Reduction in Daily Attendance Logging Time

Live App: <https://wcsattendancetracker.netlify.app/> | GitHub: <https://github.com/GabbyDev0402/wcs-attendancetracker>

- Replaced physical attendance rosters with proactive truancy algorithms that flag at-risk students.
- Optimized NoSQL database reads using session-grouped data modeling for sub-second roster logging.
- Engineered automated instruction-loss calculations to assist school administrators with intervention.
