

GABRIEL CARATIHAN

SOFTWARE ENGINEER & BUSINESS AUTOMATION SPECIALIST

Communication & Hiring: Available Exclusively via Upwork | Location: Imus, Cavite, PH

EXECUTIVE SUMMARY

Software Engineer passionate about replacing messy spreadsheets and manual processes with custom, automated web portals. Former ESL Educator turned Systems Architect with a dual perspective that bridges non-technical business leaders seeking operational ROI with robust, enterprise-grade cloud software architecture.

CORE TECHNICAL SKILLS & BUSINESS FOCUS

Languages & Frontend

- TypeScript / JavaScript
- React / Next.js (App Router)
- Tailwind CSS v4 / HTML5
- Framer Motion UI

Backend & AI Infrastructure

- Supabase / pgvector
- Google Gemini API (RAG)
- Node.js / REST APIs
- Firebase / Cloud Firestore

Business Automation

- 80%+ Operational Time Saved
- Paper-to-Digital Workflows
- RLS & Bank-Grade Security
- Agentic Prompt Engineering

&i AGENTIC ENGINEERING & BUSINESS TRANSLATION WORKFLOW

Architected applications using advanced agentic workflows via the Antigravity IDE. Directed AI models (Gemini 3.5 Flash / 3.1 Pro) to rapidly prototype UI/UX, establish PostgreSQL & NoSQL data schemas, enforce Row Level Security (RLS) policies, and automate end-to-end business logic, reducing development lifecycles significantly.

EDUCATION & PROFESSIONAL BACKGROUND

Computer Programming Practitioner

Imus Computer College — Systems & Software Development

ESL Educator

Washington School — Educational Technology & Workflows

GABRIEL CARATIHAN

Communication & Hiring: Available Exclusively via Upwork | Location: Imus, Cavite, PH

FEATURED PROJECTS & BUSINESS ROI IMPACT

1. AttendancePro Tracker v2.0 (LIVE PRODUCTION SYSTEM)

ROI: 80% Reduction in Logging Time & Zero Ghost Logins

Category: In Active Use @ Washington School | Live Demo & Repository Code Available via Upwork

- Officially deployed at Washington School. Engineered isolated student portals (/student/class/:classId).
- Real-time attendance metric synchronization across 3 roles, homework lockouts, & 7-day date range filters.
- Built AuthContext profile revocation hooks to block ghost logins for deleted student profiles.

2. Enterprise Communications Intranet

ROI: 100% Policy Compliance Verification & Zero Lost Announcements

Category: High-Compliance Intranet & Audit Logging | Live Demo & Repository Code Available via Upwork

- Replaced unorganized email blasts with digital read-receipt tracking & instant CSV compliance logs.
- Implemented Role-Based Access Control (RBAC) with Cloud Firestore Security Rules.
- Streamlined institutional announcement workflows with secure multi-role administrative oversight.

3. Washington Assessment Portal

ROI: Saved Teachers 15+ Hours/Week in Manual Grading

Category: Multi-Tenant LMS & Assessment Engine | Live Demo & Repository Code Available via Upwork

- Architected dynamic exam creation engine utilizing polymorphic React form components.
- Engineered real-time pivot-table data aggregation for Master Gradebooks & administrative analytics.
- Enforced strict multi-tenant data isolation and time-gated client routing for exam security.
