

GABRIEL CARATIHAN

BUSINESS AUTOMATION ENGINEER & WORKFLOW SPECIALIST

Communication & Hiring: Available Exclusively via Upwork | Location: Imus, Cavite, PH

EXECUTIVE SUMMARY

Business Automation Engineer specializing in replacing spreadsheets, paperwork, and manual workflows with custom business systems. Former Educator with a dual perspective that bridges non-technical school administrators and business owners with streamlined, production-ready web portals that eliminate administrative bottlenecks and deliver measurable ROI.

CORE TECHNICAL SKILLS & BUSINESS FOCUS

Languages & Frontend

- TypeScript / JavaScript
- React / Next.js (App Router)
- Tailwind CSS v4 / HTML5
- Framer Motion UI

Backend & AI Infrastructure

- Supabase / pgvector
- Google Gemini API (RAG)
- Node.js / REST APIs
- Firebase / Cloud Firestore

Business Automation

- 80%+ Operational Time Saved
- Paper-to-Digital Workflows
- RLS & Bank-Grade Security
- Agentic Prompt Engineering

&i AGENTIC ENGINEERING & BUSINESS TRANSLATION WORKFLOW

Architected applications using advanced agentic workflows via the Antigravity IDE. Directed AI models (Gemini 3.5 Flash / 3.1 Pro) to rapidly prototype UI/UX, establish PostgreSQL & NoSQL data schemas, enforce Row Level Security (RLS) policies, and automate end-to-end business logic, reducing development lifecycles significantly.

EDUCATION & PROFESSIONAL BACKGROUND

Computer Programming Practitioner

Imus Computer College — Systems & Software Development

ESL Educator

Washington School — Educational Technology & Workflows

GABRIEL CARATIHAN

BUSINESS AUTOMATION ENGINEER & WORKFLOW SPECIALIST

Communication & Hiring: Available Exclusively via Upwork | Location: Imus, Cavite, PH

FEATURED PROJECTS & BUSINESS ROI IMPACT

1. Washington School International (Online Portal - PRODUCTION)

ROI: 80%+ Reduction in Operational Friction & 100% Automated Grade Sync

Category: In Active Production @ Washington School | Live Demo & Repository Code Available via Upwork

- Engineered multi-role institutional portal (Admin, Faculty, Student) with React 19 and Firebase Firestore.
- Architected 24-column Academic Performance Grid with dynamic SHS track mapping and styled .xls spreadsheet export.
- Developed polymorphic assessment builder with live read receipts, rapid scoring desk, and diary/vocabulary workflows.

2. Washington School Learning Resource Center (LMS & OPAC - PRODUCTION)

ROI: 93% Faster Cataloging & <10s Circulation Desk Throughput

Category: In Active Production @ Washington School | Live Demo & Repository Code Available via Upwork

- Engineered cloud-native LMS & 24/7 OPAC public catalog using Next.js 14 App Router, TypeScript, and Supabase RLS.
- Built multi-tier ISBN metadata enrichment pipeline (Google Books + Open Library API) with resilient fallback.
- Developed in-browser Code128 barcode generation, <10s circulation desk, & zero-password student clearance portal.

3. Washington School IB CAS Digital Portfolio Portal (PRODUCTION)

ROI: 100% Paperless IB Audit Readiness & Zero-Friction External Sign-Offs

Category: In Active Production @ Washington School | Live Demo & Repository Code Available via Upwork

- Built full-stack IB CAS compliance portal using Next.js 16 App Router, React 19, TypeScript, and Supabase RLS.
- Engineered multi-strand tracking (Creativity, Activity, Service) with reflection logs and cloud evidence attachments.
- Designed passwordless magic-link verification for external mentors and read-only routes for official IB audit reviews.
